

# How We Count Music

Below are some of the notes we use in music. Each note has a name and a value or length. Here are their American names and values in 4/4 time:

quarter note		(ta)	1 beat
eighth note		(ti)	1/2 beat
eighth note pair		(ti-ti)	1 beat
dotted quarter note		(ta-ee)	1 1/2 beats
half note		(two-oo)	2 beats
dotted half note		(three-ee-ee)	3 beats
whole note		(fo-o-o-or)	4 beats

A rest is a silence. For every note, there is a rest of equal value. Here are some rests we will use in our music:

quarter rest		(sh)	1 beat
half rest		(re-est)	2 beats

Music is written so that we read it from left to right and top to bottom, just as we read a book. Our music is divided into sections called **measures** or **bars**. Measures are separated by **bar lines**. A **double bar line** is placed at the end of a song.
